

BayScribe adds BayScribe Mobile for Apple users

BayScribe takes another step in simplifying the dictation process and further reducing facilities dependencies on proprietary hardware and traditional dictation devices.

CHICAGO, IL — April 6, 2009 — BayScribe, makers of the world's first and only High Availability Dictation & Transcription System (Virtual Reporting Solution), continued the evolution of the BayScribe platform today with the launch of BayScribe Mobile for the Apple iPhone, iPhone 3G and 2nd Generation iPod Touch.

This is the company's second mobile application following the release of BayScribe Mobile for the BlackBerry last summer. BayScribe accepts digital dictation from all major manufacturers of digital handhelds, but firmly believes that the future of handheld dictation is on Smart Phones like the BlackBerry and iPhone because this further reduces facility's dependency on single-purpose devices. "A large percentage of Authors already carry one of these two devices, so providing them a utility to dictate whenever and wherever they wish is simply more efficient and more cost-effective", said Steve Bonney, VP of Business Development at BayScribe.

The addition of BayScribe Mobile will allow Authors to utilize their Apple iPhone and iPod Touch (2nd Gen) in lieu of the traditional handheld to quickly, easily and securely submit high quality digital dictation into the BayScribe Dictation platform from anywhere they have an internet connection. Mr. Bonney continued, "As we continue to work more closely with VMware, look for expanded mobile offerings from BayScribe in the later part of the year" – a clear reference to the acquisition of Trango by VMware in November of last year.

The product is available for purchase on the Apple iTunes AppStore for \$29.95. "Our goal is to make it quick and easy for Authors to dictate into our system and what better than the iPhone," said Ron Neuenberger, President of BayScribe. "Authors get all of the features they are accustomed to including Rewind, Fast Forward, Insert & Overwrite... plus they can add a Subject ID and pick a Report Type, all things which speed the report creation process" added Mr. Neuenberger.

"BayScribe Mobile extends additional benefits to the Authors and the Transcriptionist, as well as the facilities administration. BayScribe Mobile improves the Total Turnaround Time (tTAT) by eliminating the docking and upload process. Some doctors are carrying dictation around in their lab coat for days, delaying the report creation process, delaying the administration of care and delaying the billing process. BayScribe Mobile jump starts the report creation process and makes everyone's life a bit easier," said Mr. Bonney.

About BayScribe

Established in 1999, BayScribe provides Web-based Dictation & Transcription solutions – anywhere access for Authors and Transcriptionists to dictate, review, approve and distribute reports.

For decades, Port-based architectures have been the mainstream in Dictation system technology often requiring an abundance of proprietary hardware while limiting system capacity and scalability. Our thought leading management team conceived and delivered the industry's first and only virtual dictation appliance architecture producing limitless throughput and accessibility without single-purpose hardware.

BayScribe promotes affordability and accountability, leveraging the cost efficiencies of off-the-shelf hardware and the technology benefits of VMware ESX/ESXi Server as well as offering a monthly cancel-anytime license. No longer does High Availability and Disaster Recovery need to be terms reserved for infrastructure – Zero downtime is a reality for Dictation and Transcription technology with BayScribe.

Every month, tens of thousands of clinicians rely on BayScribe to capture and deliver the audio for their reports.

The image shows a screenshot of the iTunes App Store interface. The top navigation bar includes 'File Edit View Controls Store Advanced Help' and the 'iTunes' title. A search bar contains 'bayscribe'. The left sidebar shows 'LIBRARY' with categories like Music, Movies, TV Shows, Podcasts, Applications, and Radio, and 'STORE' with 'iTunes Store' and 'Purchased'. The main content area displays the 'BayScribe Mobile' app page. The app icon is a green square with 'BayScribe Mobile' text. The app details include: Category: Medical, Released Mar 05, 2009, Seller: C. R. Neuenberger, © 2009 BayScribe, Version: 1.1, and 0.5 MB. The price is \$29.99 with a 'BUY APP' button. Below the app details is a preview image of the app's interface on an iPhone, showing a 'Dictate' screen with a large green record button and the instruction 'Touch the record button below to begin recording.' The right sidebar contains an 'APPLICATION DESCRIPTION' section with the following text: 'BayScribe Users – Decrease your Report Turnaround Time with BayScribe Mobile!', 'Turn your iPhone, iPhone 3G or 2nd generation iPod Touch into a wireless digital dictation device. Dictate reports with ease and quickly upload them into the BayScribe Dictation platform. No more docking your digital handheld with your PC every time you need to submit reports.', 'BayScribe Mobile has all of the features you expect including: - Insert - Overwrite - RWD/FF', 'Plus, you can add a Subject ID and Worktype to speed the transcription process.', 'Dictate numerous reports on the go, 'Save' them on the device and then 'Upload All' at your convenience. Get a confirmation receipt back that the file has been successfully uploaded.', 'This application is exclusively for users of the BayScribe Dictation platform.', 'For more information about BayScribe visit us at <http://www.bayscribe.com>.', 'LANGUAGES: English', and 'REQUIREMENTS: Compatible with iPhone and iPod touch (2nd generation) Requires iPhone 2.2 Software Update'.
